

LEAFPROOF®

ADVANCED GUTTER PROTECTION SYSTEMS

MANUFACTURER'S LIMITED WARRANTIES

Leafproof® Material Warranty

GP Industries, LLC. warrants to you the purchaser, that under normal sunlight, exposure to the weather, natural elements, and proper maintenance, the painted finish on Leafproof® products will not peel, flake, chip, crack or blister for as long as the original registered purchaser lives at or owns the property described on the registration certificate and subject to the limitations set forth below.

Leafproof® Performance Warranty

GP Industries, LLC. warrants to you, the purchaser, that Leafproof® will keep gutters from becoming clogged and overflowing as a result of the interior of the gutter and downspouts filling with debris such as leaves, twigs, needles, or seeds, subject to the terms and conditions, exclusions and limitations, requirements and legal rights stated in this Warranty. Leafproof® products are engineered to transfer all but inconsequential droplets of run-off water into the gutter when properly installed and maintained. It is the responsibility of the installing dealer to assure that the Leafproof® system is performing as designed and has been properly installed.

Conditions

For these warranties to apply it is required that your gutters first be thoroughly cleaned. Gutters must also be properly sloped, downspouts and underground drains must be cleared of any debris or obstructions and any downspout screens must be removed. All warranties will be null and void if the Leafproof® system is not properly installed by an authorized Leafproof® Dealer.

Exclusion to Warranties

These Warranties are granted to the initial retail purchaser and transferable with proof of transfer only, and cover only the manufacturing defects as specified herein. Warranties cover manufacturing defects only, and they do not cover any other damage or material failure including, but not limited to, normal fading, damage caused by conditions beyond the control of the manufacturer, such as improper installation, settling of the building, failure of the structure (including foundations and walls), use of incompatible equipment, chemical pollutants, salt, fire, flood, ice dams, lightning, windblown objects, earthquakes, hurricanes, atmospheric conditions or other catastrophic weather as defined by the U.S. Weather Bureau, other acts of God, intentional acts, unreasonable use or failure to provide reasonable maintenance. GP Industries, LLC. does not warrant and will not be responsible for any costs, defects or damage with respect to the removal or re-installation of Leafproof® products or components. The geographical location, the quality of the atmosphere and regions where hardwood tree tassels and/or pine resin are prevalent in excessive amounts, the top surface of the Leafproof® system must be periodically cleansed to prevent debris build-up. Under these conditions, Leafproof® should be sprayed off with an ordinary garden hose or pressure hose, from the ground, to maintain performance excellence. Painting the specially coated Leafproof® products will void the Warranty.

Warranty Claims

Claims for defects under this warranty must be sent to the installation company for service and resolution. Service calls for non-warranty repair or adjustment may result in a service charge. All other inquiries may be sent to GP Industries, PO Box 940, Elkhorn, NE 68022 Attention: Customer Service Department.

Remedy and Rights

GP Industries, LLC. liability under this warranty is limited to repair or replacement of the Leafproof® section(s), at its option, for the failing parts of the system. If, after you have submitted your claim, it is determined by GP Industries, LLC. that the product has failed due to manufacturer's defects, GP Industries, LLC. will, at no charge, replace the defective Leafproof® section(s). Free shipping of these replacement parts will also be included.

Registration and Transfer

To activate this Limited Warranty, the original purchaser and the installing contractor must fill out, sign, and mail in the registration certificate within 30 days of the installation date. To transfer this warranty, you must send a copy of the title transfer of the property shown on the registration certificate, and a copy of the registration certificate within 30 days after the transfer, along with a money order or a check for \$50.00 for the transfer.

LEAFPROOF® Warranty Registration

Complete and mail this section within 30 days of installation to:
GP Industries PO Box 940, Elkhorn, NE 68022.

This registration of limited warranties must be completed by the initial retail purchaser of Leafproof® and the installation company.

IMPORTANT MAINTENANCE TIPS

During manufacture and installation, natural oils may adhere to Leafproof® and cause minor runoff on newly installed systems. This is normal and will stop after 30-60 days.

Normal weathering will enhance the performance of the Leafproof® system. Over time, however, dirt may build up around the horizontal nose/edge of the system. Annual spray cleaning using a garden hose with a sweep nozzle or pressure hose will help maintain performance excellence. In regions where excessive tree sap, hardwood tree tassels, and/or pine resin are prevalent, this front edge may require additional periodic cleaning.

Alignment is critical for performance excellence. Only allow your certified or authorized dealer to adjust or tamper with the system, and do not allow ladders to come in contact with the gutters or the Leafproof® system attached thereto. The performance of Leafproof® is reduced with the use of paints and waterproofing chemicals. Do not paint the Leafproof® system.

Leafproof® is designed to be a closed system. Water flows into the gutter at the pre-set gap along the gutter front, but birds and animals are prevented from entering and obstructing water flow. If gaps, spacing, misalignment, or missing endcaps allow birds or animals to enter the system, contact your Leafproof® installer for service.

If your Leafproof® is damaged by actions beyond your control (such as hail and other acts of nature), corrections should be made immediately to maintain peak performance. If accidental damage or misalignment does occur, please call your Leafproof® dealer for service.

Leafproof® will not eliminate ice formation or icicles at your eaves. Ice formation is mostly caused by factors not related to your gutter system. In fact, you will probably see more ice (icicles) on the outside of the Leafproof® system because an open gutter tends to collect ice inside the gutter whereas Leafproof® is engineered to discourage anything from entering the gutter except water. Therefore, it is normal to see icicles on the outside of the Leafproof® system, unless it is a heated system.
